

# SICHEM Bucharest '24

## SICHEM 2024

### **Intensive Processes and Artificial Intelligence - A New Paradigm in Chemical Engineering -**

The **SICHEM 2024** offers a great opportunity for scientists, researchers, and experts active in the fields of Chemical and Biochemical Engineering from both academia and industry to present their newest research discoveries, share insights and exchange the latest ideas.

The conference provides an excellent opportunity for scientists from Europe and from all over the world to meet and discuss the latest advances in chemical and biochemical engineering domains, and Material sciences applied to the life sciences and engineering.

The conference topics include:

- A – Chemical and biochemical engineering
- B – Applied organic, inorganic, and supramolecular chemistry in process engineering
- C – Biomaterials and composites in chemical and biochemical applications
- D – Green applied chemistry and agro-resources valorisation

Following the great success of the **last edition** held also in Bucharest, this **XXX<sup>th</sup> edition of the International Symposium of Chemical Engineering and Materials** will be held from **11-13 April in Bucharest, Romania**

Don't miss this opportunity to **[submit your abstract](#)** for **oral presentations and poster sessions** within the **[conference topics and sessions](#)**.
